

Product Overview

VirtuSpect is a software platform that revolutionizes inspection management. The system automates inspection workflows, ensures regulatory compliance, and integrates seamlessly with your core platforms. VirtuSpect transforms inspections into efficient, reliable processes that help businesses reduce risks, improve quality, and operate more effectively.

Core Features and Capabilities

Automated Workflow Management

VirtuSpect takes the complexity out of inspections by automating end-to-end workflows. The platform reduces manual intervention, allowing businesses to handle inspections more efficiently.

Verified Virtual Inspections via Mobile App

Leveraging Truepic's industry-leading image authentication technology, **VirtuSpect's** Verified Virtual Inspection Mobile App guarantees the integrity of visual data. Images undergo over 35 authenticity checks.

Intelligent Exception Handling

The platform includes advanced exception handling capabilities that automatically detect and flag any discrepancies found during inspections. These exceptions can be managed in real-time, reducing delays.

Microsoft Azure-Powered Data Storage

VirtuSpect uses Microsoft Azure Blob Storage to securely store inspection data, ensuring compliance with industry regulations. The platform supports long-term data retention for up to 10 years (or more).

Integration with Enterprise Systems

Seamless integration is at the heart of **VirtuSpect's** value proposition. The platform is designed to connect with key industry systems, such as Loan Origination Systems (LOS) and Healthcare Facility Management Software (HFMS).

Compliance and Risk Mitigation

VirtuSpect is designed to help businesses navigate complex regulatory environments. With customizable inspection templates and detailed reporting, the platform ensures that inspections meet industry standards.
